Product Overview

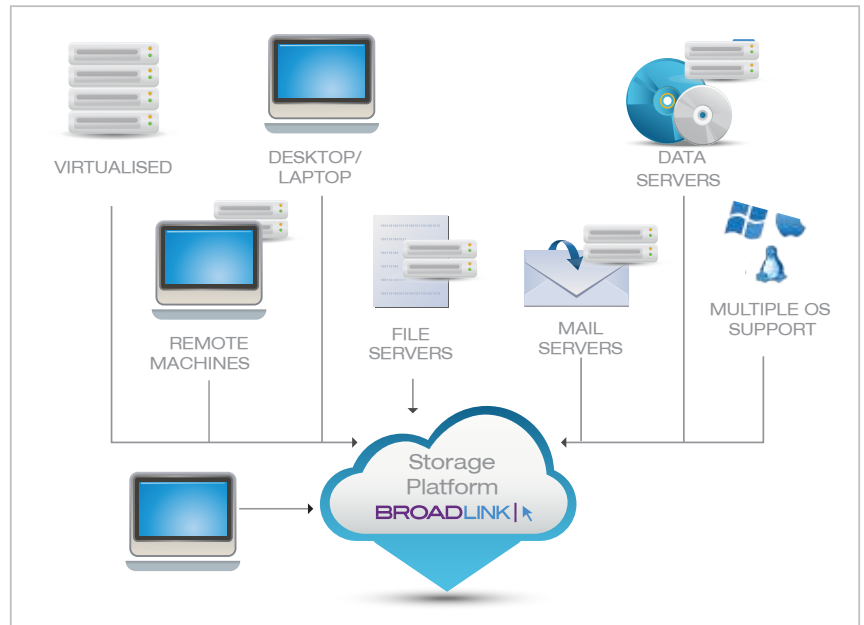

Advanced, flexible and yet easy to manage backup and recovery solution designed to protect infrastructure regardless of whether it is physical or virtualised.

Delivered from highly secure and resilient data centres in South Africa, Broadlink Backup is a service that provides rapid, cost-effective, secure, reliable offsite backup – allowing customers to recover anything, anywhere, at any time.

Broadlink's market-leading technology is designed to protect large, complex environments, efficiently and with minimal operational costs.
