

LTE-A is the brand new, high speed Rain network, which allows you access to the internet in a way in which you have never experienced!

Why do I need LTE-A?

Fibre-like speeds and reliability

with the bonus of not having to wait for Fibre to come to your area!

Plug & Play!

No installation costs or hassles. You literally just plug it in, switch it on and get connected.

Need to be online while on holiday?

No problem - the network is expanding each day and with the ease of installation, you can take your router with you wherever you go... just make sure to check your holiday location on the coverage map!

No nasty surprises

at the end of the month! These services are capped - and you have access to top ups at great rates...

No contract required

...sign up on a month to month basis

How much is this going to set me back?
