- No large capital investments required to integrate into existing infrastructure

## Complementary Services

- Cloud PBX
- Dedicated Internet Access (DIA)
- Wireless Broadband (WDSL)
- Layer 2 Microwave Access (MetroNet)
- Fibre Broadband

## Product Overview

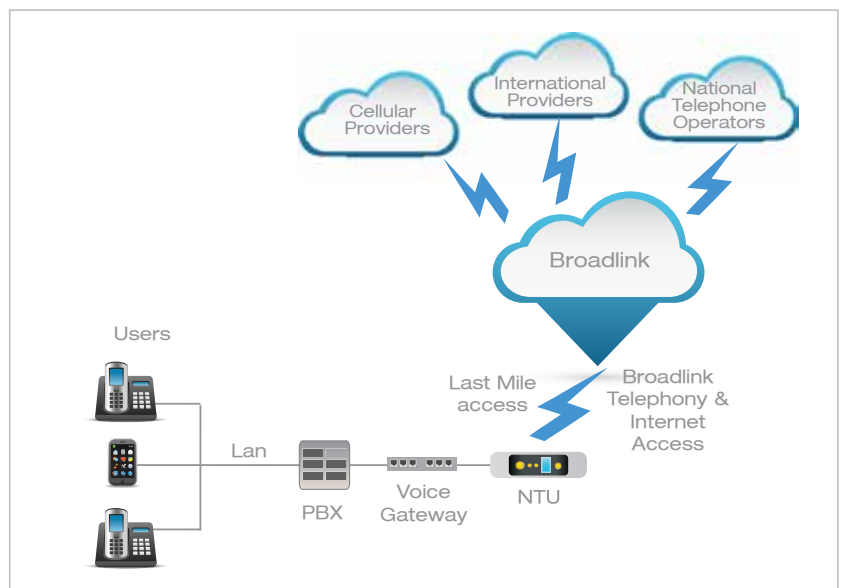

BroadTalk is a business-grade, IP-based voice service offering an alternative to existing Telco infrastructure. The solution operates via a class 5 IP voice switch, with voice interconnects terminating directly into the traditional telecom service providers.

BroadTalk is an all-in-one solution that offers a high-quality, dedicated voice service through a single access medium. This simple solution provides unrivalled flexibility to meet the unique requirements of medium to large businesses.

This voice solution offers competitive call rates on national, local, international and cellular phone calls as well as free inter-branch calls, ensuring a reduction in your total telecommunication costs.
