

MetroNet-Lite is a cost effective, business-grade broadband connectivity solution.

Features

- Wireless broadband alternative to bonded ADSL and similar services
- Utilises licensed spectrum for carrier-grade quality of service
- Low contention ratio of 10:1
- Various speeds available from 2Mbps up to 100Mbps
- Dedicated voice channel with voice traffic not counting towards your data cap
- 99.5% uptime

Benefits

- No fixed lines required
- Choice of data plans allows for increased flexibility and cost management
- Symmetrical service – equally fast upload and download speeds
- Immune to downtime caused by cable theft
- End-to-end solution
- Voice bundles and Hosted PBX services available as optional add-ons

Product Overview

MetroNet-Lite is a broadband service catering for the primary connectivity requirements of small and mid-sized businesses. This fixed wireless solution is a symmetrical service which offers speeds of up to 30Mbps on a low contention ratio.

MetroNet-Lite Uncapped is a bundled solution which includes last mile access and uncapped data* for a single monthly cost.

This solution provides companies with a high quality broadband internet connection with the flexibility to choose the data option that will best suit your business requirements.

*Fair usage policy applies to Uncapped packages
